PROPERTY SALE FOLLOWING CARE HOME MOVE

Is there a possibility they could return home?

Deciding to sell someone's property after they've moved into care is a big decision for a Deputy or Attorney. We can provide all the information and evidence you need to support your decision-making.

Our person-centred assessment will help you take every practical step to reach the best decision. It includes:

- Adult Social Care Needs Assessment – what type of care does the person need and is this likely to change in the future?
- A Decision Specific Mental Capacity Assessment – is the person able to decide on their residency and care?
- A Best Interest Checklist – to evidence the decision-making process and ensure any decisions are compliant with current legislation and best practice.
